WILD CAT SERIES

The Edge Wildcat is the most technically advanced hot water / steam machine on the market.

Its packed with quality features such as a slow speed pump and motor unit.

A micro processor control system allows beneficial features such as leak detection and total stop. Low level fuel and chemical sensors prevent unnecessary breakdowns by not allowing damage to occur if fuel or chemicals run out. A washer packed with features and a high cleaning effect.

The versatility of the Edge Wildcat series is supported by a comprehensive range of accessories including: Rotating Brushes, Wash Brushes, Foam Equipment, Wet Sand-blasting, Drain Nozzles, Turbo Lances and Extension Lances. Together these guarantee and optimum solution to all cleaning jobs.

- Designed to be technically advanced but at a realistic price.
- The Wildcat range of machines has features not available on more expensive competitors machines.
- The leak detection feature will stop the machine if a leaking gun causes the machine to restart on stand-by 6 times within a 20 minute period.
- The total stop feature will automatically switch the machine off if it has not been restarted in standby mode for 20 minutes. This prevents the machine starting up if it is on standby overnight or when left unattended.
