CARPETLINE 500S - 700

500S

700

- All purpose extractors
- High suction and drying capacity
- Quiet operation available
- Flexible, full range of accessories
 - Easy to operate
 - User friendly maintenance
 - Easy to manouver
- Split tank system for ease of transportation

The Edge Carpetline 500S and 700 are professional carpet extractors with efficient vacuum motors for fast cleaning and drying of big carpeted areas. The tank capabilities in both solution and waste offer great autonomy to the user. The 500S is a particularly quiet carpet extractor, (60 decibel only), and because of this is ideally suited for daytime cleaning applications such as in banks, hotels and offices. The 700 has 2 vacuum motors providing even greater cleaning and drying capabilities. The 700 has a solution and waste tank capacity of 70 litres

in each, offering even longer autonomy of operation. Each model is also able to take the optional HS1800 instant heater to heat up the solution to provide greater and more effective cleaning capabilities. Both models are supplied complete with the aluminium wand with 3 spraying nozzles. Edge Carpetline extraction machines clean deep down to the carpet base, achieving maximum hygiene and stain removal. Dust removal, spot cleaning, revitalising your carpet are all dealt with quickly and easily.
